**FIND
YOUR EDGE
WITH US.**

Hello. We're glad you found us.

We love finding stuff – it's kind of our thing.

We're DPL Telematics, a leading provider of advanced asset monitoring, GPS and telemetry technologies for the construction, agriculture, rental, mining, rail, fleet and oil-field industries. With over 20 years of experience and almost \$1,000,000,000 in customer mobile assets

trusted to us, we deliver a complete suite of cellular monitoring solutions. Our award winning products include the AssetView and AssetCommand lines, FleetViewOBDII solution for vehicles, and more.

But enough about us – let's talk about you.

You want to find your biggest asset. A competitive edge.

We can help. Like we said, finding stuff is kind of our thing. And in a highly aggressive market, finding a competitive edge can be a real challenge. The eternal search for increased efficiency, reduced loss and risk, and better margins means you need a superior product with superior performance.

Our goal is to deliver to you the most reliable product with unsurpassed support. Every unit is built, tested and serviced, with expert product support available.

Our commitment to you is to offer world-class solutions and deliver first-rate service, with uncompromised quality.

Roads. Rock. Rail. No matter what your fleet rides on, we have a solution for you.

We have been delivering powerful technologies to your industry for over 20 years. Since 2000, almost \$1,000,000,000 in customer mobile assets have been trusted to our award winning solutions. We deliver rugged, reliable products, and in-depth experience working with companies just like yours.

At DPL Telematics, we are flexible and always on the cutting edge of new technologies. We

use our strong technical background and market specific knowledge to maintain a reputation as a leader and solution provider. We understand that not all assets are created equal, and what worked on a truck yesterday might not work on a loader today. For that reason, we are the total fleet solution, pairing the appropriate product for your short and long term needs, across your entire operation from on-road vehicles to off-road equipment.

Say hello to our little friends.

We're pretty proud of our lineup, and we're so confident you'll love 'em too that we offer a 30-day, money-back guarantee. A truly

risk-free way to see everything our technology can do for you!

Battery-powered compact GPS asset trackers

For years our customers told us exactly what they were looking for in an asset tracking device. Rugged. Water-proof. Durable. Dependable. Easy to use.

We listened. And we're pretty sure we nailed it. The AssetView is designed for non-powered, exposed assets, where long battery life is essential, using standard batteries.

Rugged, compact, hard-wired GPS asset trackers

Our AssetCommand models are rugged, compact, hardwired GPS tracking devices, with a variety of inputs and output. The electronics, backup battery and antennas are all located

within a durable housing for fast deployment. It is available for 4G LTE-CatM1 networks globally. It offers the ability to track and monitor any asset in a variety of conditions.

Compact, real-time GPS tracking via OBDII

FleetViewOBDII is a powerful combination of compact GPS and integrated OBDII. It enables not only vehicle tracking, but also fleet reporting and management.

The powerful unit gives you real time visibility into improper or inefficient use of vehicles, as well as safety concerns like excessive speeding, harsh braking or unnecessary idling.

TruTrace Adaptive Tracking, only from DPL Telematics.

In the evolution of asset tracking, TruTrace is an adaptation available only from DPL Telematics. TruTrace updates its location based on the actual activity and movement of the asset, giving more detailed reporting when moving

and automatically adjusting to fewer reports when stationary to preserve the battery. This powerful, unique combination delivers a true long life battery solution with real time locating capabilities.

A solution for every asset. Always with our money-back guarantee.

We understand that not all assets are created equal, what might have worked on a truck yesterday will not work on a loader today. For that reason we are the total fleet solution,

pairing the appropriate product for your short and long term needs across your entire operation from on road vehicles to off road equipment. Put our expertise to work for you.

Our products win awards, and our customer's trust.

Recognition is gratifying, but earning your business is what really motivates us. When the rubber meets the road (literally), its performance that counts. And we deliver.
